Healthcare providers abroad

At present, Sanitas does not recognise any healthcare providers abroad.

Terms and conditions for laboratories

The above recognised healthcare providers commission a laboratory with the genetic embryo screening. The laboratory must have appropriate accreditation pursuant to the Swiss Reproductive Medicine Act (FmedG).

For non-invasive prenatal testing (NIPT), Sanitas recognises all Swiss laboratories that have received approval from the Federal Office of Public Health (FOPH) to perform cytogenetic and molecular genetic tests. We do not list the individual laboratories. You can find the current list on the FOPH website: bag.admin.ch
