

Supplementary insurance

Medical Private

Free choice of doctors worldwide

Three good reasons for choosing Medical Private

Outpatient treatment
abroad

Cover for doctors in
Switzerland who bill
according to their own
rates

Costs covered up to
CHF 100,000 per
calendar year

sanitas

Your basic insurance covers standard benefits such as planned medical treatment only within Switzerland and at statutory rates. This plan allows you to extend your free choice of doctors both inside and outside Switzerland.

The Medical Private supplementary insurance plan covers costs for planned outpatient treatment provided by doctors and medically prescribed therapies worldwide. This way, you have a free choice of doctors abroad, too, for example if you want to receive treatment from your long-standing family doctor in a neighbouring country.

Go to a doctor of your choice

This supplementary insurance also covers benefits provided by non-KVG/HIA doctors, who work in Switzerland but charge according to their own rates and are therefore not covered by basic insurance. Medical Private covers the costs if, for example, your trusted gynaecologist decides to start charging according to their own rates.

Costs covered up to CHF 100,000 per calendar year

Medical Private covers the costs described above up to a maximum of CHF 100,000 per calendar year. You personally contribute 10% of the treatment costs, up to a maximum of CHF 1,000 per calendar year.
