

Living will

Make your wishes known

sanitas

A living will allows you to state your personal preferences if there comes a time when you're no longer able to communicate them.

Which medical treatments would you want to receive and which would you refuse if there comes a time when you lack capacity and cannot make your wishes known? It is important that you can make these decisions for yourself. It also frees your relatives from having to make difficult decisions if something happens to you.

Get professional advice

In cooperation with the Swiss Red Cross (SRC), Sanitas offers its Preference customers a free consultation to help answer these questions. Preference customers also have the option of filing their own living will securely with the SRC.

Preference service: living will

Sanitas customers with semi-private or private hospital insurance benefit once from the following free services from the SRC:

- Advice and support in drawing up your living will.
- Option to update an existing living will.
- Your living will filed securely and confidentially with the SRC.

Sanitas does not have access to your living will.

This offer is available until 31 August 2023.

Important

For the costs to be covered by the SRC, don't forget to mention that you're insured with Sanitas.
